

REUSE is delighted to invite you to the final ReWEEE conference, a European-funded Life + project. The event will be the opportunity to wrap-up 5 years of actions aiming at developing a Waste Electrical and Electronic Equipment (WEEE) prevention culture in Greece and beyond, and share expertise with stakeholders involved in WEEE collection, prevention, repair, preparing for re-use and recycling.

Why attend this event?

The main objective is to present and discuss the main results of the project to stakeholders involved or interested in WEEE collection, prevention, repair, preparing for re-use and recycling, as well as to policymakers. The three different sessions will allow participants to understand how the waste hierarchy can be properly implemented in the WEEE treatment value chain. The webinar will also include

testimonies from stakeholders sharing their challenges and practical experiences. Emphasis will be put on open discussions between the speakers and the audience.

The main outputs

The ReWeee Project aimed at preventing the creation of WEEE, notably through the development of two WEEE sorting centers in Greece (Athens and Thessaloniki) prioritising the preparing for re-use of WEEE, the development of a web platform for donating and exchanging EEE, and the organisation of events promoting the repair of EEE (Repair Cafés).

The working language of the workshop will be **English**.

Please register [here](#).

Should you have any questions, please feel free to contact Mathieu Rama (mathieu.rama@rreuse.org – Tel: **+32486037896**).
